Jabali Care Haven

**:The Campaign:**

## ***Linking toilets to waste to value systems that produce energy and fertilizer***

At Jabali Care Haven we have a different view on how we approach charity work, we employ the concept of Venture Philanthropy.

**Venture Philanthropy (VP)** is a high-engagement and long-term approach whereby our campaigns are geared towards creating impact to the persons with disabilities and vulnerable men, women and children that Jabali Care Haven supports.

**:AT A GLANCE:**

*Jabali Care Haven realization that with the CORONA VIRUS PANDEMIC (COVID-19) there will be a need by schools to maintain high standards of Hygiene. Thus we are looking at building and providing access of affordable toilets to schools that children with disabilities and under-privileged school going children in rural areas. The toilets would primarily be waterless Compost toilets, that efficiently convert the waste into organic compost manure. The manure would then be packaged and commercially sold to farmers in centers run by persons with disabilities, vulnerable men and women primarily under the care of Jabali Care Haven.*

The advantages of the waterless compost toilets are;

- *Save Money and the environment*
- *Sewage and chemical free*
- *Water free and Save water*
- *Odour Free and Reduce water borne diseases in schools*
